

Jakob Knicley

Projects

Astroplanner

A user-friendly website used to plan out night: for star-gazing.

This was a group project, on which I focused mostly on Javascript/jQuery and APIs.

Languages used were HTML, CSS, and Javascript.

Visit at fiskoal.github.io/astroplanner

RotMG-Tools

A website of helpful tools for players of the popular MMORPG Realm of the Mad God. This is a solo side-project.

Languages used are HTML, CSS, and Javascript

Visit at fiskoal.github.io/rotmg-tools

Weather-Dashboard

A project I worked on to easily lookup weather based on search query.

Languages used were HTML, CSS, and Javascript.
